DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Harold Wells on June 5, 2008.

The application has been amended as follows:

Claims 26-37 have been cancelled.

In claim 51, line 15, replace "A" with "a"

In claim 52, line 15, replace "A" with "a"

Allowable Subject Matter

Claims 5-13, 16-18 and 39-52 allowed.

The following is an examiner's statement of reasons for allowance: Regarding claim 51, the prior art does not teach or fairly suggest a microfluidic device that comprises sample well, a hydrophilic capillary passage in liquid communication with the sample well, a segment (defining a uniform volume) of said hydrophilic capillary

passageway disposed between two vents from the passage way to the atmosphere; a transfer hydrophilic capillary passage way in liquid communication between said segment of the hydrophilic passageway and a reagent well and further being located between the two vents to the atmosphere; a hydrophilic capillary stop disposed within the transfer hydrophilic capillary passageway, the stop preventing transfer of the uniform volume until the resistance of the capillary stop is overcome by means for applying force other than centrifugal force. The means for applying force according to the specification include air pressure, vacuum, electroosmosis and the like. Claim 51 limitations can be seen in figure 2.

Regarding claim 52, the prior art does not teach or fairly suggest a microfluidic device that comprises sample well, a hydrophilic capillary passage in liquid communication with the sample well, a segment (defining a uniform volume) of said hydrophilic capillary passageway disposed between two vents from the passage way to the atmosphere; a transfer hydrophilic capillary passage way in liquid communication between said segment of the hydrophilic passageway and a reagent well and further being located between the two vents to the atmosphere; a hydrophobic capillary stop disposed within the transfer hydrophilic capillary passageway, the stop preventing transfer of the uniform volume until the resistance of the capillary stop is overcome by means for applying force other than centrifugal force. The means for applying force according to the specification include air pressure, vacuum, electroosmosis and the like. Claim 52 limitations can be seen in figure 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
